HAAPASALO

“Good stove has to have a lot of stones”, says Ville Haapasalo

Ville Haapasalo, Ville Haapasalo Duo

According to Ville Haapasalo, a good woodburning stove has to have a lot of stones. And this stove has 200 kilograms of stones in it. On top of the great amount of stones this stove model has a label signed by Ville Haapasalo himself.

Harvia Ville Haapasalo woodburning stoves offer a unique and magnificent sauna bath experience. The large amount of stones enables you to throw water on the stove and it will give off heat (“löyly”) even at a lower temperature. Good heat is ensured even if the fire dies down in between.

Harvia Ville Haapasalo 240 stove is a perfect choice for a middle-sized wood-heated sauna (max. 24 m³). The cast-iron glass door allows the warm glow of the fire to complement the sauna atmosphere. The adjustable legs make the stove easy to install and place in the sauna.

Harvia Ville Haapasalo 240 Duo stove is the right choice for people who want to conveniently heat their sauna from another room or outside the building. The opening direction of the door can be changed, making these stoves even easier to use. The adjustable legs make the stove easy to install and place in the sauna.

 10–24 m³

 200 kg

Model: WK240VH, WK240VHLUX

Dimensions:

WK240VH width 600 mm, depth 600 mm, height 830 mm, weight 75 kg

WK240VHLUX width 600 mm, depth 600+180 mm, height 830 mm, weight 80 kg
